FAISALKHAN PATHAN

Software Engineer (Fresher) | Java | Spring Boot | REST APIs | MySQL
Pune, Maharashtra | +91-9322741210 | faisalpathan1819@gmail.com
LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

B.Tech Information Technology graduate (2026) with hands-on experience building full-stack Java applications with Spring Boot, Spring Security, Spring Data JPA, Hibernate, and MySQL. Built two projects on a layered Controller-Service-Repository-Entity architecture, including a role-based support ticket system with REST APIs and enforced business rules. Seeking an entry-level Java / Spring Boot Developer role to apply strong programming fundamentals and a self-driven approach to learning on a team codebase. Available to join immediately.

TECHNICAL SKILLS

Languages & Core: Java, Object-Oriented Programming (OOP), SQL
Frameworks & Libraries: Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate, REST APIs
Security: BCrypt password hashing, role-based access control, HTTP Basic authentication
Front-End: HTML, CSS, JavaScript, Bootstrap, Thymeleaf
Database: MySQL
Tools: Git, GitHub, Maven, Postman, Eclipse, VS Code
Problem Solving: Actively practicing Data Structures & Algorithms to strengthen core programming fundamentals

PROJECTS

HelpDeskPro – Role-Based Support Ticket System | GitHub

Java 17 · Spring Boot · Spring Security · Spring Data JPA · Hibernate · MySQL · REST APIs · JavaScript · Bootstrap 5

- Built a support ticket system with three roles (USER, SUPPORT, ADMIN): users raise tickets, admins assign them to support staff, and support staff move them through a fixed OPEN, IN_PROGRESS, RESOLVED flow.
- Enforced business rules in the Status enum so every code path shares one rule: no skipped or reversed statuses, assignment required before status changes, and no reassigning resolved tickets.
- Secured the app with Spring Security (BCrypt-hashed passwords, HTTP Basic against MySQL users); roles enforced in SecurityConfig and again in the service layer, with role-based ticket visibility and restricted comments.
- Developed REST APIs for auth, tickets, assignment, status, comments, history, and a role-scoped dashboard; added a status history timeline, input validation, and a global exception handler returning clean JSON errors. Tested in Postman.

StudentHub – Student Management System | GitHub

Java · Spring Boot · Spring Security · Spring Data JPA · Hibernate · MySQL · Thymeleaf · Bootstrap 5

- Built a full-stack Student Management System on a layered Controller-Service-Repository-Entity architecture, with complete CRUD backed by Spring Data JPA and Hibernate for persistent MySQL storage.
- Secured it with Spring Security form-based login; implemented search by name, sorting, pagination, and a dashboard showing total students, passed/failed counts, average marks, and top student.
- Built a responsive Thymeleaf and Bootstrap 5 front-end with form validation, plus REST endpoints (GET, POST, PUT, DELETE) tested in Postman.

PORTFOLIO

faisalpathan1210.github.io – personal portfolio website (HTML, CSS, JavaScript) hosted on GitHub Pages, showcasing projects and resume.

EDUCATION

Rashtrasant Tukadoji Maharaj Nagpur University (RTMNU), Nagpur | 2022 – 2026
B.Tech — Information Technology | CGPA: 6.6/10
Maharashtra State Board — Class XII | 90.5% | 2022
Maharashtra State Board — Class X | 87% | 2020

CERTIFICATIONS & ACHIEVEMENTS

- Employability Enhancement Programme – "Skill Up: Empowering the Next Generation," Centum Foundation, supported by Infosys Foundation (Jul 2025)

LANGUAGES

English, Hindi, Marathi — Read, Write, Speak
